# CUMINU WHITEPAPER

March 2023

# 1

## Introduction

**CUMINU was created in May 2021 on the Ethereum blockchain with the goal of becoming the leading provider in online adult content.**

Adult entertainment is an industry as old as time. It is estimated that the net worth of the entire industry is as large as **\$100 billion**. Platforms such as Chaturbate and OnlyFans have demonstrated the extraordinary popularity of adult content over the internet. A total of 180 million users spent a staggering \$4.8 billion on OnlyFans in 2021 alone. Only Fans was last estimated to be worth \$18 billion.

However, these platforms have also faced controversies related to content moderation, concerns over exploitation and the reliability of payment providers. Some have criticized the platforms for enabling the objectification of women and putting the demands of corporations before creator needs.

CUMINU noticed an opportunity in the market and set about building an 18+ platform that addresses the issues facing the industry, whilst putting creators and fans first. Aptly named Cummuniti, the platform's mission is to differentiate itself from other adult content platforms with unique features and services such as:

- Enhanced Privacy and Security
- Loyalty Programs and rewards
- Virtual reality and augmented experiences
- Marketplace for adult products
- NFT and blockchain-based collectibles

## Tokenomics

CUMINU is an **ERC20 token** that went live on **12 May 2021**.

The CUMINU / Ethereum pair was launched on Uniswap, one of the largest decentralized cryptocurrency exchanges in the world.

### Supply

The maximum supply of CUMINU is ten billion (10,000,000,000) tokens.

- **90% of tokens** have been added to the Uniswap liquidity pool and locked for one hundred (100) years. This protects investors funds and gives confidence knowing there will always be a liquid market to trade \$CUMINU.
- **10% of tokens** have been reserved for team, marketing, and development purposes to ensure the project can be built into something world class.

\*As at the date of this white paper 231,937,765 tokens or 2.3% of supply has been bought back and burnt. (See point 4).

### Token Launch

There was no ICO or presale. The initial liquidity was provided by the CUMINU team. The token was launched via fair sale.

### Transaction Fees

There are no transaction fees when trading the CUMINU token. Buyers keep 100% of their token purchase.

### Liquidity Lock

The CUMINU liquidity is locked for 100 years.

## Buy back and Burns

CUMINU uses the earnings from its ecosystem and 18+ platform Cummuniti to buy back CUMINU tokens on the open market before burning them. This mechanism does several things to benefit holders:

- Decreases the total CUMINU supply
- Adds Ethereum to the liquidity pool
- Provides regular buying and support
- Delivers rewards to holders instantly

To date CUMINU has bought back and burnt a total of **231,937,765 tokens** or 2.3% of supply.

## 18+ Platform and Project Utility

### Version 1 V1 Beta Platform

CUMINU's V1 beta 18+ platform was released in July 2021. It quickly gained over 1,000 fans and 30 verified creators. The platform was basic in function but offered creators the ability to live stream, post static content, direct message with fans and receive tips in BNB coin.

A 10% fee was charged on tips to creators. The ecosystem generated over US\$140,000 in earnings which helped to buy back and burn the first 2.3% of CUMINU supply.

Whilst the platform was a success, the team found that it was too heavily focused on streaming. The overwhelming response from talks with content creators was they preferred to post static content and charge a monthly access fee. This coincides with recent data that shows that up to 50% of Only Fans revenue come from subscriptions whilst another 30% is from direct message requests.

## Version 2 Cummuniti

After 8 months in development Cummuniti is preparing for launch. The platform has been designed to rival the biggest in the adult content business and challenge the monopoly.

### Economics

Cummuniti will charge a 20% fee on creator earnings. Platform earnings will fund:

- 10% CUMINU buy back and burns
- 5% platform development
- 5% marketing

### Unique Features

Extensive research has gone into what unique features and services Cummuniti should offer that will differentiate it from the other adult content platforms.

1. **Enhanced privacy and security:** Cummuniti offer users greater privacy and security features than other platforms. For example, fans have access to anonymous payments and the platform uses advanced encryption to protect user data.
2. **Loyalty programs and rewards:** Cummuniti will offer bonuses for creators who produce high-quality content or for fans who make frequent purchases.
3. **Affiliate program:** People will be incentivized to refer creators to the platform. A fee of 5% of the referred creators' earnings for the first 12 months will be paid to the referrer.
4. **Virtual reality and augmented reality experiences:** Cummuniti will allow fans to interact with creators in a more immersive way. This includes such things as Cummuniti metaverse.
5. **Marketplace for adult products:** Cummuniti plans to offer a marketplace for adult products such as sex toys, lingerie, and other related items. This will provide an additional revenue stream for creators and offer fans a more complete adult entertainment experience.
6. **NFTs and blockchain-based collectibles:** Cummuniti will offer non-fungible tokens (NFTs) and other blockchain-based collectibles that enable creators to monetize their content in new and innovative ways. For example, creators could sell exclusive digital content or limited-edition collectibles to their fans.

## A message to creators from Cummuniti
